U.S. MILITARY MOLLE COMBAT MEDIC VEST SYSTEM

FILLED TO
U.S. ARMY MEDICAL DEPARTMENT SPECS !

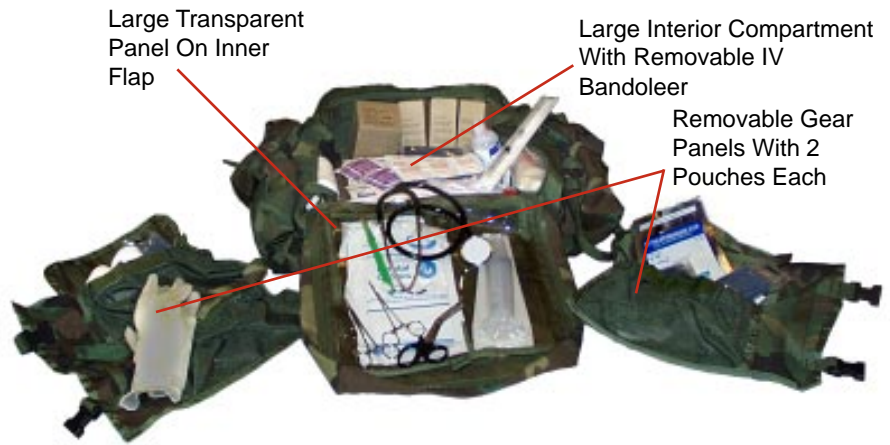

The CMVS Is Here!

The MOLLE Combat Medic Vest System (or CMVS) is a one-size fits all vest with detachable pockets and a resupply bag. The MOLLE Combat Medic Vest is designed to hold 40% of the components as specified by the U.S. Military and the remaining 60% fits in the MOLLE Medic Bag or Resupply Bag. The panels on the MOLLE Medic Vest are made of Olive Drab nylon mesh material and the vest is adjustable for torso, length and girth. The CMVS provides the Military Medic with hands-free capability to easily carry medical supplies to the battlefield. The newly fielded CMVS also allows the medic the flexibility to configure their own load distribution to meet specific mission needs and to optimize comfort. The CMVS is a component of the Surgical Instrument and Supply Set Medical Equipment System. The CMVS features 4 Medic Pouches on the MOLLE Combat Medic Vest and 4 Medic Pouches on the MOLLE Medic Resupply Bag, for a total of 8. The Medic Pouches utilize the interlocking attaching strap system to attach moveable pockets to load bearing equipment that is low profile, very secure and unaffected by extreme temperatures. In addition to the Medical Pouches on the Combat Medic Vest, 2 ammo pouches are also provided. The MOLLE Medic Resupply Bag features the 4 Medical Pouches on the exterior of the bag, along with a large interior compartment that contains 2 removable medic supply panels and a removable IV Bandoleer. The MOLLE Medic Resupply Bag has shoulder straps for carrying as a pack in addition to a Grab Handle. Our Tactical Medic Pharmacy™ can fill these 2 great additions to the U.S. Military inventory in accordance with U.S. Army Medical Department requirements, excluding pharmaceuticals, controlled narcotics and IV solutions.*
