

U.S. MILITARY/MICH TACTICAL COMMUNICATIONS SYSTEM

STATE-OF-THE-ART MODULAR TACTICAL COMMUNICATIONS EQUIPMENT FOR THE WARFIGHTER

Unsurpassed performance and state-of-the-art engineering provides tomorrow's tactical communications system today... the U.S. Military MICH Tactical Communications system provides the warfighter and tactical professional with a waterproof modular system that consists of a Special Ops Headset in two configurations, a push-to-talk (PTT) radio interface adapter, a tactical speaker microphone, plus a tactical big button push-to-talk (BBPTT). At the heart of the system is the Special Ops Headset that provides the tactical professional with volume controlled active hearing protection in addition to tactical communications with either one or two radio systems, plus full stereo ambient sound transmission - in all, the most complete tactical comm system on the market!

Compatible with the ICOM IC-F3, MBITR PRC148 and Virtually all Tactical and Military Radios.
